

INDUSTRIAL COATING SERVICES

MB Century's Industrial Coatings is based at our Wairakei, Taupo complex, with modern abrasive blasting and painting facilities, purpose built to provide a controlled environment, ensuring quality results are consistently achieved, and industry best standards are adhered to.

FACILITIES

Our purpose built abrasive blasting and painting facility is compliant to Australian standard 4114, and is large enough to accommodate projects of all shapes and sizes. A track and trolley system ensures large items up to 70 Tonnes can be easily moved between blasting (with recovery system) and coating areas saving costly handling. Our industrial blast and spray booths are both geothermally heated allowing coatings to be applied in all weather conditions, also ensuring manufacturers coating specifications are adhered to.

Surface preparation methods available are Sandblasting to specification and profile requirements, Soda Blasting, Aluminium Oxide Blasting (for sensitive equipment) and Vapor Blasting (dustless) services.

CAPABILITY

Coating Systems

A full range of coating systems are available to protect your valuable

assets, from immersion and high abrasion environments right through to commercial automotive and marine. This offers our clients leading edge corrosion protection in severe environments right through to durable high gloss finishes for the marine, transport, and machinery markets. MB Century can draw on a wealth of knowledge within the team, offering advice on coating specifications to suit all budgets and requirements.

Mobile Units

In addition to MB Century's purpose-built facility we also offer mobile abrasive blasting and painting services, when combined with our containment systems, and dust/fume extraction equipment your project can be completed safely, even in the most sensitive of environments.

For large or time constrained projects, multiple crews can operate allowing for 24/7 production. All our staff are confined space and heights trained,

and our pressurised equipment certified annually, ensuring Health and Safety legislation and documentation is followed and provided to clients ensuring all work is carried out to the highest safety standards.

PRODUCTS

Altex Coatings is MB Century's main product supplier for heavy industrial coatings. Altex Coatings is the market leader and number one supplier of industrial coatings in New Zealand.

QUALITY

MB Century is accredited and compliant to ISO 9001. MB Century offers quality workmanship and technical expertise from our dedicated team of experienced, Carboline trained and authorised applicators. No matter the size of your project the team strive for the highest standard possible and achieve top end results every time.

Digital and hard copy QA packs are compiled and available with detailed information on all

SERVICES

parameters of surface preparation and new coatings throughout each stage of a project. This gives you piece of mind that the chosen system is fit for purpose, film builds are to specification and have been applied to meet the product manufacturers' recommendations.
